

# The Perfect Combination of Control

## Versatility and Efficiency!

### Why Choose the Titan ULT?

Introducing the Titan ULT Exhaust Fan—the equipment that will transform the way you think about ventilation!

Available in Upblast models, this exhaust fan is ideal for demanding environments such as commercial kitchens, combining precision, high performance, and long-lasting durability.

### Robust Construction: Durability and Strength in Every Detail

Made from aluminum alloy, its sturdy metalized sheet base ensures weather resistance and unmatched durability.

With backward-inclined blades, the Titan ULT rotor is engineered to optimize airflow and maximize efficiency.

In addition, we conduct meticulous rotor balancing tests according to ISO 1940 G4.0 standards, ensuring smooth and reliable operation in any setting.

### Versatility and Ease of Use

- \* The Titan ULT (Upblast) stands out for its versatility. Its manual access cover simplifies maintenance, making operation quick and efficient.
- \* You have full control of the airflow: direct it upward in rooftop models or outward in wall-mounted versions.
- \* For industrial kitchen applications, external wiring is positioned away from the airflow stream, ensuring safety and efficiency.

### Quiet Performance, Outstanding Results

- \* The key advantage of the Titan ULT is the combination of high efficiency and quiet operation.
- \* With an airflow capacity of up to 14,000 m³/h, the Titan ULT delivers consistent and reliable performance.

### Get ready for superior ventilation!
