

Maintain Air Quality and Enjoy the Silence.

Renew the air with efficiency and peace of mind!

In your home or office, the Sonora 10 EC Exhaust Fan is the ideal choice for ensuring air quality—quietly and efficiently.

Exhaust Fan **SONORA 10 EC**

A market-leading product line since 2015, known for its silent performance and sleek rounded design, it has been the perfect choice for air renewal in various spaces such as bathrooms, powder rooms, offices, and more.

Discover **EC EFFICIENCY:**

At the forefront of energy efficiency technologies, meet the EC Motors

- A breakthrough in ventilation and building automation;
- Energy savings with a wide range of sizes and power levels;
- Significant reductions in maintenance, noise, weight, and physical footprint;
- Applicable in various fields;

And now, they're ready to take your ventilation systems' performance to unprecedented levels.

Why Choose **EC Motor**?

EC motors go far beyond energy efficiency — they revolutionize how ventilation is designed.

Enhanced Efficiency:

EC motors provide optimized performance with lower energy consumption.

Compact and Lightweight:

Thanks to their external rotor design, these motors are smaller and lighter, saving space and resources.

Control Flexibility:

Compatible with PWM, 4-20 mA, and 0-10 V inputs, EC motors allow for precise speed control.

Integrated Monitoring:

EC motors feature monitoring capabilities, providing real-time feedback on fan operation.

Frequency Versatility:

They can operate in both 50 Hz and 60 Hz systems, ensuring consistent performance.

Unshakable Reliability:

Fewer moving parts result in greater reliability and extended service life.

Discover some key features **ABOUT THE PRODUCT:**

- Wall or ceiling installation
- Quiet operation (27 dBA)
- Easy installation
- Exclusive circular design
- Thermal protection
- 5-year warranty
- Motor with ball bearings
- Made from ABS plastic
- Built-in backdraft damper
- Anti-vibration mount
- IP 44 rated
- Class II
- Dual voltage
